An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr Rinne on 3/11/04.

The application has been amended as follows:

IN THE CLAIMS

In claim 26, lines 3 – 4, "at least a portion of" was deleted.

In claim 27 part (b) line 3, "at least a portion of" was deleted.

In a telephone call to Mr Rinne, the examiner requested the foregoing amendments be made to the method of making and product claims. Applicants agreed.

The following is an examiner's statement of reasons for allowance:

2003/0200796 is cited to show it was known to use molecularly imprinted polymers (see claim 26) to purify air and liquid (see paragraph [0002], penultimate line) contaminated with benzene, toluene, ethyl benzene, and xylene. Stefan is cited to show that the skilled artisan would have expected to find MTBE alongside benzene,

toluene, ethyl benzene, and xylene in contaminated groundwater contaminated by leaking underground premium gasoline storage tanks after about 1979 (when MTBE appears to have come into widespread usage as a premium gasoline oxygenate). The prior art does not suggest using MIPs to remove MTBE from contaminated or other type water, however.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
